All,

I am writing to acknowledge how great our community and families have been doing in view of the low incidences of COVID-19. This is certainly something to celebrate as we enter the middle of the summer. While we progressively move to a greater sense of normalcy in our communities we want to ensure our positive trajectory continues.

Our community Health Agents concur that your positive actions of wearing face masks and maintaining social distancing continues to work in our favor as you slowly expand your social circle. This continues to be critical in preventing a spread of COVID-19 in our communities.

In the event that you do feel ill for any reason it is still recommended that you do not report to work and that you contact your doctor. It is important to note that methods of testing and the timeline to receive results have improved tremendously.

If your results are positive for COVID-19 our community Health Agents will receive the results and conduct a thorough contact tracing protocol with you. We ask that you take the call from the Health Agent and support their efforts to prevent a spread. The Health Agents maintain confidentiality throughout and work directly with individuals.

While I wish we could celebrate an end, we have to continue our vigilance to ensure an end is closer to us.

Respectfully,

Steven M. Lamarche

Superintendent of Schools
