Tue, Mar 10, 2020 at 3:01 PM

All,

We continue to work closely with the Charlton Health Director James Philbrook who is working closely with the Department of Public Health (DPH). As of the time of this email we do not have results regarding the adult who was tested for COVID-19. Out of an abundance of caution, the family's students are home until we have a confirmation either way. As soon as we have more information we will be sure to communicate it to you.

I understand the inquiries the school principals and I have received, but please note that we have been advised by the Department of Public Health and others that it is illegal to provide identifying information about the students or family. In addition, for the time that the students were in school yesterday they were all asymptomatic or did not show any signs of illness.

Our custodial staff continues to disinfect our schools and we have excellent nurses to provide answers to some of your questions regarding your student. Again, we need your help, please do not send sick children to school.

The following links are great resources and up-to-date information about COVID-19, [MA DPH COVID-19](#) or the [Center for Disease Control and Prevention](#)

We are aware of our own anxiety and that of our children. Attached you will find a COVID-19 flyer and below are some resources to aid you in discussions with your children,

[Talking to Children About COVID-19 - A Parent Resource](#)

[Hand washing to Prevent Illness at School](#)

In the event that you choose to keep your student home it is marked as an absence. We will continue to work through all of your concerns.

We continue to stay aware and review all guidance from the Department of Public Health and the Department of Elementary and Secondary Education.

Respectfully,
