All,

I am writing share that we have had a number of additional positive cases in our educational community. We learned of five new cases that did not require contact tracing for reasons previously shared through these communications.

Of particular note, we learned of two other new cases that are connected to one learning classroom environment. This is a specialized program environment and the new cases appear to qualify as in-person transmission due to attendance to school. Contact tracing has been completed as all members of the environment were placed in quarantine after learning of an initial positive case. This makes three positive cases in one environment. Additionally, we reached out to the Health Director/Agent from Charlton and Dudley to meet tomorrow and review these cases and our protocols. We are paying very close attention to this matter.

Lastly, we had number of qualified candidates apply for the DCRSD COVID Coordinator and hope to finalize the hiring process next week.

Respectfully,

Steven M. Lamarche

Superintendent of Schools
