DCRSD Update 11.10.2020

Dudley-Charlton Regional School District <notifications@dcrsd.org>
To: Dudley-Charlton Regional School District <notifications@dcrsd.org>

Tue, Nov 10, 2020 at 7:59 PM

All,

I am writing to inform you that we were notified early this evening of a positive COVID-19 case within the Dudley-Charlton RSD educational community. This member of our community has not been in-person for 10 days, therefore school contact tracing was not deemed necessary between the number of days this individual was not in-person and the resulting positive COVID-19 today. We have been in contact with our local health agents regarding this case.

In addition, I write to share that each time we receive a positive COVID-19 case there are many details to process. We work each and every day on our communication strategies and protocols.

With that said, we have not come across or received notification that this positive COVID-19 case or others previously communicated are connected to each other or as a result of attendance to our schools. We have no evidence of a spread in our schools. We believe the work of our school nurses, administration and the community health agents have prevented such spread, but we must also acknowledge and thank our educators and families for their commitment to adhere to all necessary mitigating strategies.

Lastly, I want to take advantage of this communication and wish all of our veterans and active duty personnel the best of tomorrow's recognition for your sacrifice, bravery and the example your presence sets for all of us. Thank you for your service to our country, community and family.

Respectfully,

Steven M. Lamarche

Superintendent of Schools
